SIGNIFICANCE OF THE BOSNIAN PYRAMID DISCOVERY

In April 2005, I first came to the town of Visoko, 20 miles northwest from Sarajevo, capital of Bosnia-Herzegovina. My attention caught two regularly shaped hills, which I later named Bosnian Pyramids of the Sun and Moon. For thousands of years locals have considered these hills just a natural phenomenon. However, when I first saw them, with triangular faces, obvious corners and orientation toward the cardinal points, I knew that they had to be artificial constructions despite the coverage by soil and vegetation.

I've been investigating pyramids for decades and knew that most of them, in China, Mexico, Guatemala or El Salvador, have had the same amount of soil coverage.

During the 2005, I started, at that time, one-man project paying construction companies and geologists to do core drilling and geo-morphological analysis. I announced to the world that first pyramids in Europe have been discovered at the press conference in Sarajevo in October 2005.

Soon after, I established non-profit "Archaeological park: Bosnian Pyramid of the Sun" Foundation and the pyramid investigation in Bosnia has become world's largest interdisciplinary archaeological project. We've spent over 340.000 hours in archaeological excavation, sample testing and radiocarbon dating in a period 2005-2011. We've determined that Bosnian Valley of the Pyramids consists of Bosnian Pyramids of the Sun, Moon, Dragon, Earth and Love, tumulus complex and the huge underground labyrinth.

This discovery is history-changing for several reasons:

1. First pyramids in Europe have been discovered

2. Bosnian Pyramids are the biggest pyramidal structures in the world. Bosnian Pyramid of the Sun with its height of over 220 meters is much higher than the Great Pyramid of the Egypt (147 meters).
3. Bosnian Pyramid of the Sun has the most precise orientation towards the cosmic north.
4. Bosnian Pyramid of the Sun is completely covered by the rectangular concrete blocks. Properties of the concrete, such as extreme hardness and low water absorption, are, according to the scientific institutions in Bosnia, Italy and France, much superior to the modern concrete materials.
5. Pyramids are covered by soil which is, according to the state Institute for agro-pedology, over 12.000 years old. It makes Bosnian pyramids the oldest pyramids on the Planet.
6. Below the Bosnian Valley of the Pyramids is the most-extensive underground tunnel and chamber network which runs for tens of miles.
7. Ceramic sculptures have been discovered in underground labyrinth with a mass of up to 20.000 pounds and it makes them the biggest in the ancient world

The list of the miracles in Bosnian archaeology does not end here. In the vicinity, we discovered the tallest tumulus in the World – 61 meter high. Sill bury Hill in England, on the other hand, is 60 meters high. Bosnian tumulus consists of two-layer megalithic terraces, clay layers and artificial concrete layers.

Team of physicians detected an energy beam coming through the top of the Bosnian Pyramid of the Sun. Radius is 4.5 meters, frequency 28 kHz, it is continuous and its strength grows as it moves away from the Pyramid. It contradicts our known physical laws and technology. This is the first proof of non-herzian technology on the Planet. It seems that pyramid-builders created the perpetual mobile long time ago and this “energy machine” is still working.

In the underground labyrinth we discovered three chambers in 2010 and small blue lake. Energy screening shows that ionization level is 43 times higher than the average concentration outside which makes the underground chambers healing rooms.

Further electromagnetic detection in 2011 confirmed that levels of negative radiation through the Hartman, Curry and Schneider grids are equal zero in the tunnels. No technical radiation (from power lines and technology) either. No cosmic radioactivity. Ceramic sculptures are positioned over the underground water flows and negative energy is transformed to the positive.

Another word, underground labyrinth is most secure underground construction in the world. Ideal for body rejuvenation and regeneration.

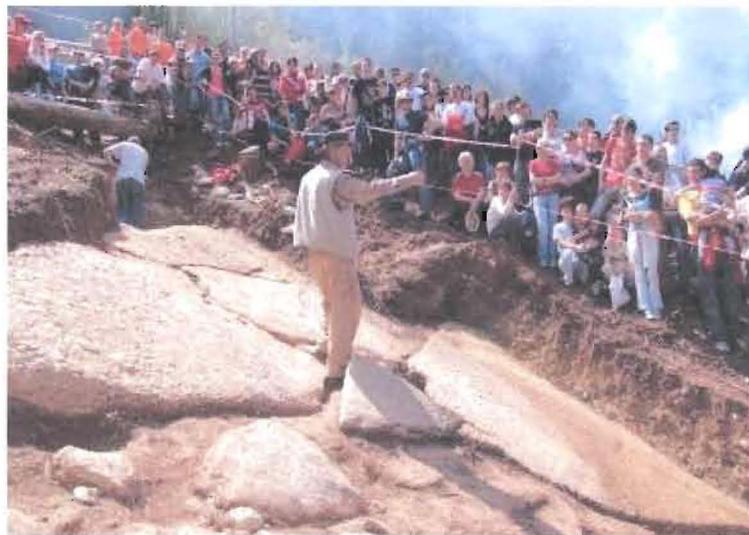

Two hundred years of Egyptology has not been enough to produce answer to question: what was the real purpose of the pyramids.

In six years of our research in Bosnia we've applied inter-disciplinary scientific methods, and looked at this complex through the physical, energy and spiritual dimensions.

We've made pioneering results in a Pyramid Science. The history will never be the same. By changing the beginning we change everything that follow: our present and our future.
